

Dog Training Referral List

It's essential that the dog trainer you select uses training techniques that encourage appropriate behavior through positive reinforcement such as food, attention, play, or praise. Look for a trainer who ignores undesirable responses or withholds rewards when the dog displays unwanted behavior. Training techniques should never involve yelling, choking, shaking the scruff, tugging on the leash, alpha rolling (forcing the dog onto his back), the use of prong or shock collars, or other techniques that frighten or inflict pain.
