

Emergency Veterinary Resources

If your pet is experiencing a medical emergency and needs immediate care, below are some clinics you may consider calling. Each clinic's ability to take on new clients will depend on their current capacity.

If you are unsure of whether your pet's condition requires emergency services, try using Vet Triage's online on-demand chat system for guidance - <https://vettriage.com/>

If your pet has ingested something, the ASPCA Animal Poison Control Line may be able to help you determine if an emergency visit is needed - 1 (888) 426-4435
